

HIGH PERFORMANCE SKID RESISTANT COMPOSITE COVERS WITH GUARANTEED PERFORMANCE.

Structural Science Composites Limited supply **Advanced Composite Covers** that are **3rd party certified** to be compliant with European Standard EN124 : 1994, don't settle for anything less. In addition we offer a best of class **Polished Skid Resistance value (PSVR)** across our entire product range.

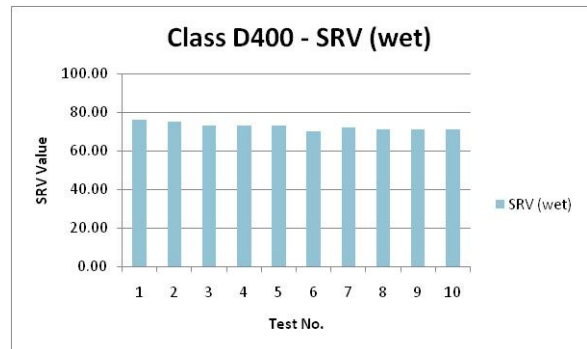

Insurance claims resulting from pedestrian slips on covers owned by Local Authorities are on the increase. These potentially costly insurance claims can be mitigated by removing the risk of slipping by installing IntelGrip Composite covers. Our innovative and extremely hard wearing tread pattern has been designed to provide **average skid resistance in excess of the minimum advisory limits** recommended by the County Surveyors Society Working Party data Collection Unit. The following table shows the degree of slip hazard for various surfaces when tested using the TRRL Pendulum Test in general accordance with BS6677 part1:1986. The higher the value the lower the risk of slipping.

TRRL Pendulum Value	Surface Condition
19 and below	Dangerous
20 to 39	Marginal
40 to 74	Satisfactory
Above 75	Excellent.

SSC IntelGrip perform, to the highest standards consistently. Our B125 class product, even after accelerated polishing exceeds 75, even in the wet,

whilst our D400 products exceed a measure of 70.

In Addition to this best in class slip skid performance, we are the only manhole manufacture that will guarantee the cover surface that provides this level of performance for a minimum 15 years.

For full details please ask about our 15 Year Product Guarantee (conditions apply).
